- Wireless 9-1-1 Calls Impacted: N/A
- Wireline 9-1-1 Calls Impacted: Yes, 235 access lines are unable to dial 9-1-1

Service Interruptions

- None reported

WEATHER OF CONCERN

NORTHERN CALIFORNIA

- Flash Flood Watch for the Kincade Fire burn area and downstream locations from Saturday afternoon through late Sunday night.
 - Rain will develop Saturday afternoon and continue at least through early Monday.
 - Excessive rain rates and storm total amounts from 3 to 4 inches may trigger flash flooding over the burn area.
- Snow levels on Saturday will be around 2,000 to 2,500 feet, however snow levels will raise throughout the day.
 - The Winter Storm Watch has been extended through the weekend.
 - I 80 Corridor over the Sierra will see snow levels at 6,000 to 7,000 feet by Sunday.
- Late Sunday into Monday snow levels will rise to near or above major Sierra Pass levels.
 - Precipitation is still likely but will taper off throughout the day and into early Tuesday morning.

SOUTHERN CALIFORNIA

- A Freeze Warning has been issued for Coastal Counties and parts of the valley have been issued with Frost Advisories
- Snow levels tomorrow will be between 3,000 to 4,000 foot range, then increases to over 5,000 feet Saturday night
 - Snowfall accumulation is expected between 4 inches or less this evening in San Diego County.
- Rainfall is expected throughout the weekend into Saturday

WEATHER KEY POINTS

11/29/19 - 12/05/19

Friday

- Snow will continue across higher elevations of the Sierra Nevada and San Diego Mtns through tonight.
- Cold temperatures continue through Saturday, including freezing temperatures in Coastal Region

Saturday-Monday

- Significant precipitation expected to move into northern and central parts of California late Saturday through Monday
 - This next weather system will impact areas north of the LA Basin up to the Oregon border
 - Significant rain (2.00-4.00") is expected across the Bay Area and over the southern Sierra foothills with strong winds also developing midday Saturday into early Sunday
 - Brief heavy rain could lead to flash flooding and burn scar impact concerns, though impacts are not currently expected to be widespread
 - The burn scars which are being actively monitored for potential debris flows during this event are the following:
 - **Ferguson, Kincade**
 - **The time of most concern is between Saturday afternoon and late Sunday night.**
 - Torrential rainfall will be possible below 7000 feet in the Sierra foothills Saturday evening through Monday evening
 - Significant snow is expected again over the Sierras and far northern CA late Saturday through Monday evening
 - Snow level Saturday and Sunday will be around 1500 ft, but the snow level will increase Sunday into Monday
 - Interstate and highway passes will once again see significant snowfall

Tuesday

- Precipitation will continue with snow level rising.. no significant impacts are expected
